

Enr. No. : 2302030430095

Assignment : 1

[Ans 1 :]

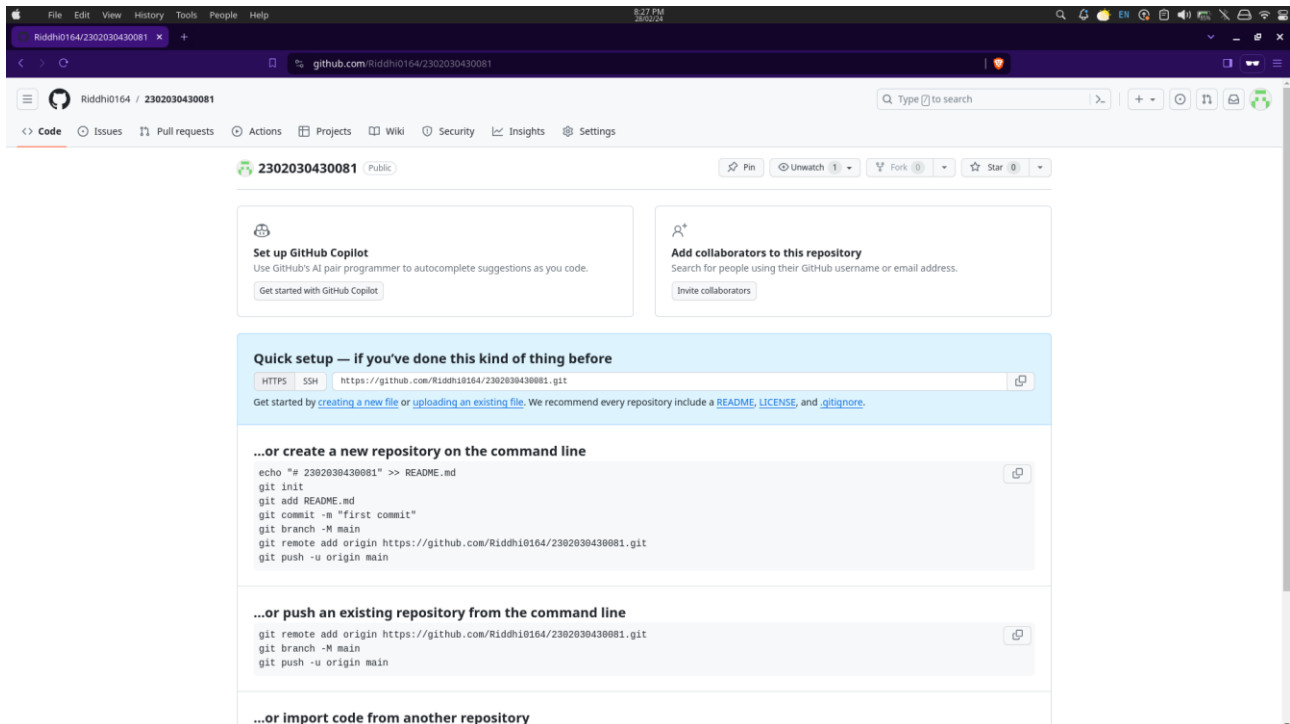

Step 1: click on the “New” button to create a new repository.

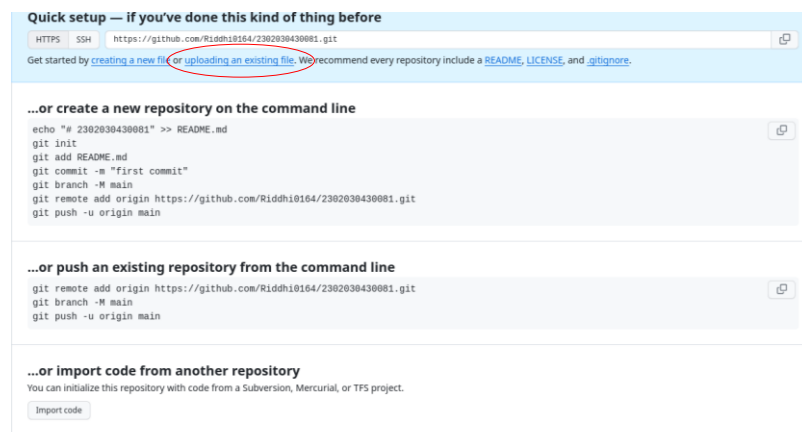

Step 2 : Give the name of the repository. Make it public or private by clicking on the given options. Add a README file if you want to. After that click on the “Create repository” button.

A screenshot of the 'Create a new repository' form on GitHub. The form is titled 'Create a new repository' and includes a sub-header 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. Below this, there is a section 'Required fields are marked with an asterisk (*)'. The 'Owner' field is set to 'Riddhi0164'. The 'Repository name' field is set to '2302030430081' and is circled in red. Below the repository name, there is a message '2302030430081 is available.'. The 'Description (optional)' field is set to 'This Repository is for SOU assignments.'. Below the description, there are two radio button options: 'Public' (selected and circled in red) and 'Private'. The 'Public' option has a sub-text 'Anyone on the internet can see this repository. You choose who can commit.'. The 'Private' option has a sub-text 'You choose who can see and commit to this repository.'. Below the radio buttons, there is a section 'Initialize this repository with:' which includes a checkbox for 'Add a README file' (checked). Below this, there is a section 'Add .gitignore' with a dropdown menu set to 'None'. Below that, there is a section 'Choose a license' with a dropdown menu set to 'None'. At the bottom of the form, there is a green 'Create repository' button circled in red.

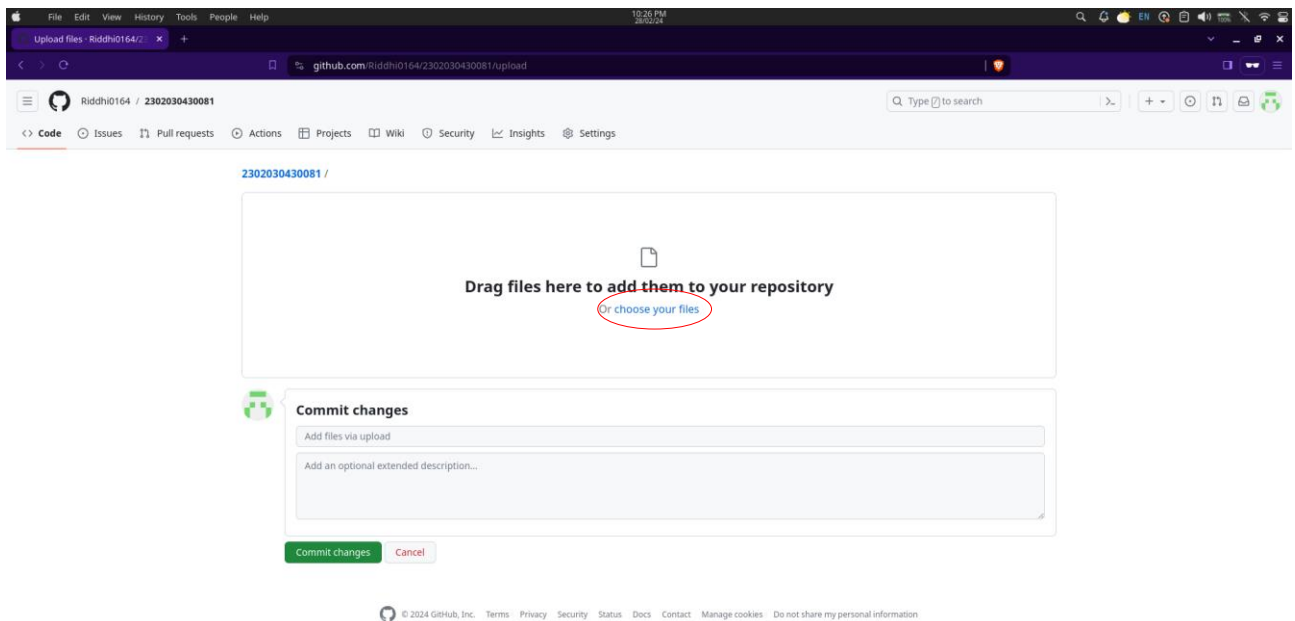

Like that, your GitHub repository has been created successfully.

Step 3 : Scroll down and you will see the option for importing code.

Click on “uploading an existing file” and you can start importing the code files and folders to your REPO or follow the commands and execute them.

Or you can Click on “choose files” then select files or folders and upload them.
